All Type Of Electrical Works

Our company offers a wide range of electrical services including residential, commercial and industrial electrical work. We provide expert solutions for all types of electrical projects, from wiring and lighting installations to circuit breaker replacements, electrical panel upgrades and more.

Plumbing Services

Our plumbing services include leak detection, pipe repairs and water heater installations, as well as emergency repairs for burst pipes, overflowing toilets and other urgent problems. Our licensed and experienced plumbers use state-of-the-art equipment to quickly diagnose and fix problems.

Interior Contracting

Our interior contracting services include custom design, installation, and renovation of interior spaces, including painting, flooring, drywall, and carpentry. We also offer specialized services such as custom cabinetry, countertops, and finish work, as well as installation of fixtures, appliances, and hardware.

Testing & Commissioning of Electrical

Our testing and commissioning services ensure that electrical systems are safe, efficient, and functioning as intended. Our experienced technicians will conduct thorough tests on electrical systems, including power distribution, lighting, and control systems, to identify and rectify any defects or issues.

AC Installation & Maintenance Service

Our AC installation and maintenance service provides expert installation of new air conditioning systems, as well as routine maintenance and repair of existing units. Our certified technicians will assess your cooling needs, recommend the right system for your space, and ensure proper installation to ensure optimal performance, efficiency, and extended lifespan.

Building Maintenance

Our comprehensive building maintenance services ensure that your commercial or residential property is well-maintained, safe, and functional. Our team of experienced technicians will perform routine maintenance tasks, including plumbing, HVAC, electrical, and carpentry work, to prevent breakdowns and extend the lifespan of your building's systems.

Building & Services Industrial Works

Our company offers a wide range of electrical services including residential, commercial and industrial electrical work. We provide expert solutions for all types of electrical projects, from wiring and lighting installations to circuit breaker replacements, electrical panel upgrades and more.

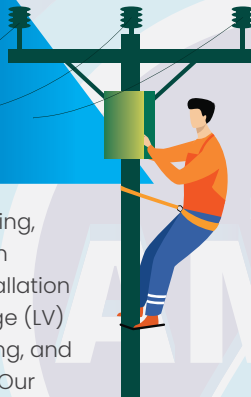

Substation Installation Works

Our substation installation works division provides turnkey solutions for the design, installation, and commissioning of high-voltage substations, including 11kV, 33kV, and 66kV systems. Our experienced team of engineers and technicians will handle all aspects of the project, from site preparation and foundation work to equipment installation and testing, ensuring that the substation is safely and efficiently operational.

HV & LV Cable Laying, Cable Jointing & Cable Termination Works up to 33KV Substation

Our HV & LV cable laying, cable jointing, and cable termination works division provides expert services for the installation of high-voltage (HV) and low-voltage (LV) cables, including cable laying, jointing, and termination up to 33kV substations. Our team is equipped to handle a wide range of cable sizes and types, from overhead power lines to underground and underground ducting systems.

Conservation of HV, LV Electrical Installation

Our HV and LV electrical installation maintenance services include expert assessment, repair and maintenance of existing electrical installations to prevent failures, minimize downtime and ensure optimal performance. Our team uses specialized tools and techniques to identify and fix problems such as corrosion, insulation damage and electrical faults, ensuring the installation is safe, reliable and compliant with relevant regulations. We also provide renovation and refurbishment services to extend the life of the installation and improve its efficiency.

DC & AC UPS System and Batteries

Our DC & AC UPS System and Battery Division offers a range of services for design, installation, maintenance and repair of Uninterruptible Power Supply (UPS) systems and batteries. Our team has experience in designing and implementing UPS systems for critical power applications including data centers, healthcare facilities and telecommunications networks. We also provide maintenance and repair services to ensure UPS systems and batteries are functioning properly and provide reliable backup power in the event of a failure.

Cable Fault Identification

Our cable fault identification services use advanced diagnostic techniques and equipment to quickly and accurately locate faults in electrical cables, including fault finding, isolation and repair. Our team uses specialized equipment such as thermal imaging, acoustic testing and cable testing tools to identify the source and extent of the fault, enabling efficient and effective cable repair or replacement. This ensures minimal downtime and reduces the risk of further damage to the cable or surrounding infrastructure.
